PROFESSIONAL SUMMARY

Computer Science graduate with professional experience developing SaaS and ERP web applications, progressing from Software Developer Intern to Software Developer. Experienced in building secure RESTful APIs, designing database solutions, and developing scalable backend systems using NestJS, Prisma ORM, Supabase, PostgreSQL, and TypeScript in Agile/SDLC environments. Passionate about backend engineering and continuous learning through real-world software development.

WORK EXPERIENCE

Inspire Holdings Inc. - Software Developer

Apr 2026 - Sept 2026

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Docker, Postman, Git, Github, SDLC, Agile

- Developed and maintained backend features, RESTful APIs, and database solutions for SaaS web applications and ERP systems using NestJS, TypeScript, Prisma ORM, Supabase, and PostgreSQL in an Agile/SDLC environment.
- Managed PostgreSQL database migrations and schema synchronization using Prisma, Supabase, and Docker, ensuring data consistency and supporting reliable deployments across development environments.
- Strengthened backend security by implementing authentication and role-based authorization across RESTful APIs, ensuring protected resources were accessible only to authorized users.

Inspire Holdings Inc. - Software Developer Intern

Feb 2026 - Apr 2026

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Postman, Git, Github, SDLC, Agile

- Developed backend features and RESTful APIs for web applications using NestJS, Prisma ORM, Supabase, PostgreSQL, and TypeScript in an Agile/SDLC development environment.
- Built and integrated 15+ REST API endpoints with Prisma ORM and PostgreSQL, improving database maintainability and supporting scalable CRUD operations across the system.
- Implemented Supabase Row-Level Security (RLS) policies for role-based access control, securing sensitive user and transaction data from unauthorized access.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, Python, PHP, Java, C#, VB.Net
Frontend: React.js, React Native, Next.js, Tailwind CSS
Backend: Node.js, Express.js, NestJS, Django, RESTful APIs, JWT Authentication, Prisma ORM
Database Management: Firebase, MySQL, MongoDB, Supabase, PostgreSQL, MsSQL
DevOps / Tools: Git, Github, Jest, Postman, Docker, Github Actions, CI/CD, ClickUp, Figma
Software Engineering: SDLC, Agile/Scrum

EDUCATION

Bachelor of Science in Computer Science
Taguig City University - September 2022 - June 2026

CERTIFICATIONS & ACHIEVEMENTS

- Google Project Management Professional Certificate (In progress)
- Cisco JavaScript Essentials 1 & 2
- Cisco Python Essentials 1 & 2
- Docker Foundations Professional Certificate
- LinkedIn DevOps Foundations: Microservices
- LinkedIn Microservices Foundations
- Department of Science and Technology (DOST) Hackathon Participant, 2026

PROJECT

SnapNutrient MacroNutrient Food Scanner App - Fullstack Developer

2025

Tech stack: React Native, Nativewind, Expo, Firebase, Jest, CI/CD, SDLC, Agile

- Built a full-stack mobile application using React Native, Expo, and Firebase, implementing user authentication, cloud-based data storage, and backend logic through Cloud Functions.
- Designed responsive UI components and optimized application performance by improving user interaction flows and resolving functional issues.
- Implemented unit and component testing using Jest to improve application reliability and maintain code quality throughout development.
