PROFESSIONAL SUMMARY

Computer Science graduate with professional experience in backend and full-stack web development, progressing from Software Developer Intern to Software Developer. Experienced in building RESTful APIs, managing databases, and developing secure, scalable applications using NestJS, Prisma ORM, Supabase, and TypeScript in Agile/SDLC environments. Passionate about backend engineering and continuous learning through real-world software development.

WORK EXPERIENCE

Inspire Holdings Inc. - Software Developer Jun 2026 - Present

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Postman, Docker, Git, Github, SDLC, Agile

- Develop and maintain backend features, RESTful APIs, and database solutions for multiple web applications and internal systems using NestJS, TypeScript, Prisma ORM, Supabase, and PostgreSQL.
- Performed PostgreSQL database migrations using Docker by generating database schemas and migrating existing tables to new Supabase databases, supporting new project deployments and maintaining data consistency.
- Implemented endpoint authorization and access control by securing RESTful APIs with authentication and role-based authorization, enforcing HTTP 401 Unauthorized responses for unauthenticated requests.

Inspire Holdings Inc. - Software Developer Intern Feb 2026 - May 2026

Tech stack: Next.js, Nest.js, Typescript, Supabase, Prisma ORM, Postman, Git, Github, SDLC, Agile

- Developed backend features and RESTful APIs for a client-based Pawnshop Management System using NestJS, Prisma ORM, Supabase, and TypeScript while collaborating in an Agile/SDLC environment.
- Integrated Prisma ORM with PostgreSQL and Supabase to improve database management, maintainability, and application scalability.
- Implemented Row-Level Security (RLS) policies in Supabase to enforce role-based data access and strengthen application security.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, TypeScript, PHP, Java, Python

Frontend: React.js, React Native, Next.js, Tailwind CSS

Backend: Node.js, Express.js, NestJS, Django, RESTful APIs, JWT Authentication, Prisma ORM

Database Management: Firebase, MySQL, MongoDB, Supabase, PostgreSQL

DevOps / Tools: Git, Github, Jest, Postman, Docker, Github Actions, CI/CD, ClickUp, Figma

Software Engineering: SDLC, Agile/Scrum

EDUCATION

Bachelor of Science in Computer Science

Taguig City University — September 2022 - June 2026

CERTIFICATIONS & ACHIEVEMENTS

- Google Project Management Professional Certificate (In progress)
- Cisco JavaScript Essentials 1 & 2
- Cisco Python Essentials 1 & 2
- Docker Foundations Professional Certificate
- LinkedIn DevOps Foundations: Microservices
- LinkedIn Microservices Foundations
- DOST Hackathon Participant — Department of Science and Technology (DOST), 2026

PROJECT

SnapNutrient MacroNutrient Food Scanner App - Fullstack Developer 2025

Tech stack: React Native, Nativewind, Expo, Firebase, Jest, CI/CD, SDLC, Agile

- Built a full-stack mobile application using React Native, Expo, and Firebase, implementing user authentication, cloud-based data storage, and backend logic through Cloud Functions.
- Designed responsive UI components and optimized application performance by improving user interaction flows and resolving functional issues.
- Implemented unit and component testing using Jest to improve application reliability and maintain code quality throughout development.
